

Clearing

Real-time risk management – not everyone can handle it.

SIX Securities Services – through SIX x-clear Ltd – provides you with comprehensive multi-platform and multi-product clearing of the highest order. What gives us our edge is our ability to provide integrated and transparent risk management services – in real-time.

How we do this is by processing your transactions and calculating the risk immediately. This gives you a consistently clear view of your exposure and mitigates any possible counterparty risk – combined with the efficiency of margining and settlement netting across multiple platforms.

Comprehensive clearing services

Founded as the central counterparty for the Swiss market in 2003, SIX x-clear Ltd today clears multiple instruments in most European markets – and is at the forefront of interoperability and competition.

Clients

As an ICM, GCM or NCM you will find the clearing services you need. These are tailored to your operational and risk management requirements and delivered at highly competitive prices. As a SIX Securities Services clearing client you can also expect the highest levels of customer service. This includes support during implementation as well as for when you want to use more services.

Trading venues

We offer clearing services for cash equity, fixed income, securities lending and borrowing as well as certificates across a range of trading venues. These include established exchanges as well as MTFs – with a strong pipeline for interoperability.

What can you expect?

Aside from one of the most respected risk management capabilities in the industry, you can also count on us for delivering operational efficiency across multiple trading venues.

SIX Securities Services
Solutions for the future. Now.
